DECK-O-FOAM®
Expansion Joint Filler

DESCRIPTION
DECK-O-FOAM Expansion Joint Filler is a flexible, lightweight, non-staining, polyethylene, closed-cell expansion joint filler. It is a chemical-resistant, ultraviolet stable, non-absorbent, low density, economical, compressible foam that offers an extended service life in both interior and exterior applications.

DECK-O-FOAM is supplied with a convenient, pre-scored "removable" strip to provide a uniform sealing reservoir in the joint. It also serves as a sealant bond-breaker and provides an economical alternative as an expansion joint in all concrete paving projects. It is compatible with all currently available cold-applied sealants.

USES
DECK-O-FOAM is ideal for use as an expansion, contraction and/or isolation joint in swimming pool decks, curb and gutter work, floor slabs, pavement patch repair, sidewalks, driveways, plazas, parking decks, highways and airport runways.

APPLICATION
Attach DECK-O-FOAM securely to the existing concrete slab, coping or form with tape or mechanical fasteners prior to pouring the next slab. Make sure that DECK-O-FOAM is level with the desired slab surfaces before finishing. If specifications require the use of a cold-applied sealant, remove the pre-scored strip and apply the sealant following the manufacturer’s instructions.

FEATURES/BENEFITS
- Pre-scored strip is easily removed.
- Economical alternative to expansion joints.
- Controls amount of sealant needed and acts as a bond-breaker.
- Eliminates costly sawing and routing.
- Flexible, lightweight and can be formed around curved objects.
- Easy to install.
- Can be used in interior or exterior applications.
